

Los Angeles World Airports

Airport Carbon Accreditation Level 3 Requirements

June 2019

Van Nuys Airport

What is Airport Carbon Accreditation?

- Airport Carbon Accreditation (ACA) is a voluntary carbon management program specifically for airports.
- The program was launched by ACI Europe in 2009.
- ACA sets requirements for airports for measuring and reducing their carbon emissions, with the ultimate goal of becoming carbon neutral.

Airports can apply for one of four levels.

- Level 1: Mapping
- Level 2: Reduction
- **Level 3: Optimization** 
- Level 3+: Neutrality

Currently, VNY is at Level 2, but is pursuing Level 3 in 2019.

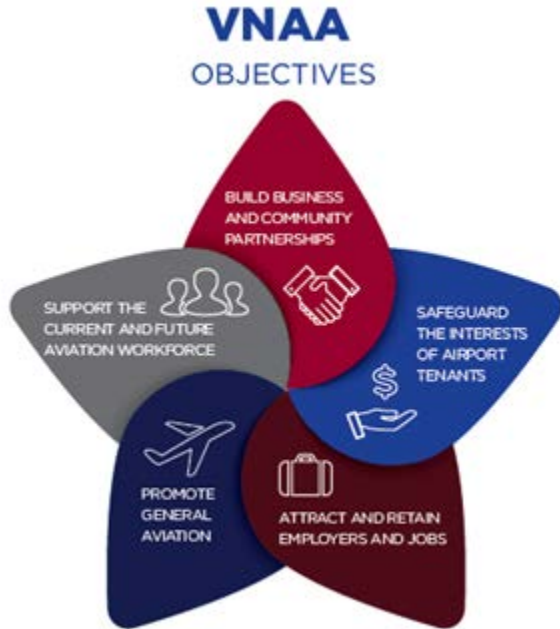

Level 3+ Offsetting own
Scope 1&2 emissions

Level 3 Engaging others
and measuring their
emissions

Level 2
Managing and
reducing footprint

Level 1
Carbon footprint

Stakeholder Engagement Plan

Information Request:

- Provide energy use data and other information to help us calculate/estimate your carbon emissions.
- Identify current and future actions to reduce energy, vehicle fuel use and/or carbon emissions.
- Participate in future meetings/trainings.

Solar panels at VNY help to reduce the Airport's greenhouse gas emissions.
