Guterrez	Family	III. PUBLIC COMMENT PERIOD	<p>As LAWA may notice from the LACK of participation in these absurd bodies, the public is not shy on its disdain for what is seen as LAWA's lack of transparency and lack of integrity. It's a select few that are willing to waste their time commenting to LAWA or CAC or BOAC. Today I'm one of those rare few. I agree with public opinion, CAC has been nothing but a shell for VNY business for years now. The inept "President(s)" operates with pathetic ego that has become a joke to residents, both on CAC and BOAC. CAC was established to represent the citizens' voice, and while there are a select number on CAC that do hold integrity and morals in their attempt to do right by the common good, other aviation plants make the body useless. Valley residents now await a new Mayor to be elected so the public can continue to circumvent these "useless bodies", and simply push for State legislation and a new Mayor's lead on the VNY Master Plan. The furtive transformation of VNY into an international commercial airport is a travesty to the entire Valley floor. I do believe the public will win, across the nation, to banning leaded fuel and if L.A. City Council fails to ensure it happens at VNY before it happens across the nation, then that is evident of the inept "leadership" we accept from these fools. SHAME be fallen upon BOAC and L.A. City Council for what our beloved Valley community group (QSWH) has highlighted for all us residents. To peace-meal contracts that circumvented LAWA's obligation to engage the public on the land use parcel leases is gross negligence and just downright disgusting. To give billionaires lucrative leaseholds that permitted outrageous hanger builds that is now catering to ignorant levels of commercial jet operations for the 1% is a betrayal to every moral, principled and honorable notion a decent human being may possess in respect of human life, wildlife and our eco system. Anyone that is not recognizing and working to reduce the unwarranted detriment that exploded in 2021 from VNY is downright morally corrupt. How dare you put this excessive poison and harm upon our children and families. You zoned for residential life in the Valley, now protect it! The airport may have been there before the communities, but we didn't have a problem with THAT airport. The communities were here BEFORE the unwarranted expansions. We were here BEFORE Gulfstream VNY and CBP services, we were here BEFORE the 2015 -2019 leasehold renewals with outrageous hanger expansions and new builds. Morally corrupt negligence from L.A. City Council members who signed off on the leaseholds, and from BOAC and "leadership" at LAWA. My family supports: https://www.socalsfv.com</p>
