

First Name	Last Name	Item	Comment	Row ID	AC Meet
Erin	Huffer-Ethial	IV. Public Comment Period	I live in the neighborhood and have a young child and elderly person in my household. I am concerned about the effects of pollution from leaded gasoline on our health. I support all efforts to conduct a new EIR to capture the effects of the airport on the local community. In addition, measures to limit touch and go's and enforcement of quiet hours. Efforts should also be made to make sure planes only start their engines once on the runway to avoid any unnecessary exposure to toxic fumes near resident homes.	CAC-PubCom-00760	6/4/20
Fran	Potaski	IV. Public Comment Period	Who gets the comments? How do we know if they are being read? Is my comments being read during the CAC meeting? Are they in the minutes who see's the public comments.	CAC-PubCom-00761	6/4/20
Laura	Lopez Williams	IV. Public Comment Period	I live directly across from the airport off of havenhurst and I often see and hear planes idling literally down my street. I can record from my front yard and have taken videos of planes idling there for several minutes on end. I often have to wear a mask when I walk my dog due to the strong smell of fumes. I worry about the proximity of the planes to my neighborhood and the long-term effects it can have on our health.	CAC-PubCom-00762	6/4/20
Fran	Potaski	IV. Public Comment Period	I have submitted numerous complaints about the touch and go operations. Pilots making early turns. Pilots flying over my home. Touch and Go Operations occurring during outside of permitted hours. Your website states 'VNY Operations staff monitors and reports possible infractions to the City Attorney's office for adjudication and enforcement actions as appropriate.' My question is has any infractions been submitted to the City Attorney's office for adjudication and enforcement?	CAC-PubCom-00763	6/4/20
Suzanne	Gutierrez	IV. Public Comment Period	I am a 20+ resident of CD6 and live right next door to the Van Nuys Airport. I have watched (and smelled) how VNY has transformed into an overgrown airport with absolutely no regard for the surrounding communities. Every single day, I breath in toxic VOC's and UFP's. Google both of those and you can read about the horrific health effects on the human body. I have diligently reached out via email, had meetings and talked to members of LAWA including the general manager. In return, I have been called "obstinate". Their responses are full of lies, suppression of our voices and sometimes just being completely ignored. Did you know that it took an entire month to get written public comment from May CAC meeting to be posted on LAWA's website? Why? Those comments were given to the CAC members BEFORE the May CAC meeting? I have been asking for LAWA to make the CAC videos downloadable. These are are posted on Vimeo, and shared on the LAWA website. Their response? The IT department has been "working on it". So, I googled how to down download videos on Vimeo. It's a paid subscription of \$144 per year. Now, was that cost included in the recent budget discussions? Clearly no, since the IT department is still "working on it". For an airport that touts a "2 billion dollar economic engine", how can you not pay \$144 for the year? I have reached out via email to the new CEO asking for a meeting as someone who represents the most vulnerable and marginalized community. His response is that his "team will reach out to determine whom from your group should be included in such a session". Keep in mind, his salary in a year is more than people in my community will see in a lifetime. When I write emails, give public comment at these meetings and voice my valid concerns, I am called "adversarial". The amount of gaslighting I have personally received could light up Los Angeles during a rolling blackout. There is not ONE thing LAWA has done to protect the community over the past 5 years. Not ONE THING. Don't believe me? THEN PROVE ME WRONG LAWA! The only reprieve, thankfully, is getting Imelda Padilla and City Council to truly understand our situation and get motions passed in order to protect us. It is our GOD GIVEN RIGHT to be able to breath clean air. Not toxic-filled air that may eventually lead to our demise.	CAC-PubCom-00764	6/4/20
Suzanne	Gutierrez	III. BOAC Agenda Items Concerning VNY	What is the update on getting some BOAC meetings to Van Nuys City Hall? I understand that Van Nuys City Hall is being renovated. However, I imagine discussions should be happening now on when those meetings will be in Van Nuys. It's unfair and unrealistic to have Valley people attend the BOAC meetings at LAX in the middle of weekday mornings, especially when VNY is on the agenda and their on NO options for call-in comments.	CAC-PubCom-00765	6/4/20
